

**Patient Name :** Mrs. وجيهه عيسى سليمان جريسات  
**Age :** 66 **Year(s)**  
**Gender :** F  
**Referring Doctor:** Dr. Samir Oweis

**Pathology No. :** P11/1999  
**Received Date :** 17/11/2011  
**Reported Date :** 19/11/2011  
**Hospital :** Personal

**Histopathology Report**

**Origin of Tissue:** 1- Gastric biopsy.  
2- EUS / FNAB peri-pancreatic tissue.  
**Clinical History :** Pancreatic mass. ? Pancreatitis. ? Cancer.

**GROSS DESCRIPTION :**

Two specimens recieved :-  
1- Gastric biopsy : Consists of two tiny fragments.  
2- EUS FNAB : Nineteen un-stained smears.

**MICROSCOPY DESCRIPTION :**

1- Sections of gastric mucosa show antral type gastric mucosa with non-specific gastritis. There is no evidence of malignancy.  
2- Smears reveal sheets of pleomorphic cells with nuclear hyperchromasia, increased N/C ratio and nuclear overlapping.

**Diagnosis**

1- GASTRIC BIOPSY : MILD NON-SPECIFIC GASTRITIS.  
2- EUS / FNAB PERI-PANCREATIC TISSUE : CONSISTENT WITH CARCINOMA.
